

Taking action on plastic...

Each year millions of tonnes of plastic finds its way into our oceans polluting the seas and harming the creatures that live in it.

Plastic doesn't decompose, it just gets smaller. Over time a single plastic bottle can break up into over 10,000 pieces of micro plastic, these very small bits of plastic can be poisonous to our marine life.

This poor turtle thinks it about to have a nice lunch but it will be his worst meal ever.

We are asking you to support us in reducing the amount of plastic we use.

Our water bottle scheme we run every year is a great way to start. As well as being 100% recyclable, the bottles we supply are designed to be a "bottle for life" and will last for as long as they need to be used. So WHY NOT join us in helping protect

the environment by limiting your order to the new intake only. We will help by providing lids free of charge for the rest of the school if required. Just look out for the option of free lids on the order form. It will help save our environment and can save you money too.

Together we can help protect our precious environment.

We will be sending out information by e-mail on how to order at the beginning of May. Look out for your e-mail or check regularly on our website
